

2019 Class Descriptions

Clarity PPM

	Name	Description
CL - Alt	Apptio and Clarity, Complementary Tools	Does your organization own Apptio or are you looking to purchase it? In this session, we will dive into what Apptio is and how it complements your current Clarity PPM solution.
CL - Alt	Know Thyself... At Work	This unique session is divided into presentation and open discussion segments, where we will focus on offering philosophies and practical tips to increase the wisdom we have about ourselves as we navigate our corporate lives. Using conscious leadership principles as a guide, we will cover topics such as empathy in the workplace, understanding and working through internal drama, and the benefits of meditation and silence.
CL - Alt	The Concepts of Creativity	The concepts of creativity are tools and habits that help you and your team become more creative. During this session, you will learn simple tricks and methods to encourage a more creative environment within your teams. Creativity training includes emotional intelligence and behavioral aspects, all-in-one.
CL - Alt	Workfront and Clarity, Complementary Tools	Does your organization own Workfront in a marketing or other group doing digital asset management? In this session, we will dive into what Workfront is and how it complements your current Clarity PPM solution.
CL - Funct	Demand Management Best Practices	Are you starting a demand management implementation? Do you want to compare how you are using these functions vs. how others are using them? In this class, we will discuss some best practices from successful customers.
CL - Funct	Demand Management OOTB Introduction	Do you want to understand the OOTB configuration and functionality of demand management? In this class, we will review the OOTB objects, views, and functions of ideas, incidents, and other related areas. We will cover both Classic Clarity and the Modern UX, highlighting differences.
CL - Funct	Demand Management Roundtable	Do you want to talk to other customers that are using or plan to use demand management? In this moderated round table, customers can share experiences and provide insights on process, configurations, challenges, and successes. We will divide into small groups and discuss customer selected topics—100% sharing.
CL - Funct	Financial Management OOTB Introduction	Do you want to understand the OOTB configuration and functionality of financial management? In this class, we will review the OOTB objects, views, views, and functions of financial plans, rates, and other related areas. We will cover both Classic Clarity and the Modern UX, highlighting differences.
CL - Funct	Financial Management Roundtable	Do you want to talk to other customers that are using or plan to use financial management? In this moderated round table, customers can share experiences and provide insights on process, configurations, challenges, and successes. We will divide into small groups and discuss customer selected topics—100% sharing.
CL - Funct	Portfolio and Roadmap Management Best Practices	Are you starting a demand or portfolio management implementation? Do you want to compare how you are using these functions vs. how others are using them? In this class, we will discuss some best practices from successful customers.
CL - Funct	Portfolio and Roadmap Management Roundtable	Do you want to talk to other customers that are using or plan to use portfolio or roadmap management? In this moderated round table, customers can share experiences and provide insights on process, configurations, challenges, and successes. We will divide into small groups and discuss customer selected topics—100% sharing.
CL - Funct	Portfolio Management OOTB Introduction	Do you want to understand the OOTB configuration and functionality of portfolio management? In this class, we will review the OOTB objects, views, and functions of portfolio management.
CL - Funct	Project and Financial Management Best Practices	Are you starting a project or financial management implementation? Do you want to compare how you are using these functions vs. how others are using them? In this class, we will discuss some best practices from successful customers.

	Name	Description
CL - Funct	Project Management OOTB Introduction	Do you want to understand the OOTB configuration and functionality of project management? In this class, we will review the OOTB objects, views, and functions of projects, financial plans, tasks, assignments, IRC, and other related areas. We will cover both Classic Clarity and the Modern UX, highlighting differences.
CL - Funct	Project Management Roundtable	Do you want to talk to other customers that are using or plan to use project management? In this moderated round table, customers can share experiences and provide insights on process, configurations, challenges, and successes. We will divide into small groups and discuss customer selected topics—100% sharing.
CL - Funct	Project Manager Best Practice "Day in the Life"	This class will provide a list of daily and weekly activities that every project manager should follow to leverage Clarity PPM more effectively.
CL - Funct	Resource Management Best Practices	Are you starting a resource management implementation? Do you want to compare how you are using these functions vs. how others are using them? In this class, we will discuss some best practices from successful customers.
CL - Funct	Resource Management OOTB Introduction	Do you want to understand the OOTB configuration and functionality of resource management? In this class, we will review the OOTB objects, views, and functions of assignments, allocations, and other related areas. We will cover both Classic Clarity and the Modern UX, highlighting differences.
CL - Funct	Resource Management Roundtable	Do you want to talk to other customers that are using or plan to use resource management? In this moderated round table, customers can share experiences and provide insights on process, configurations, challenges, and successes. We will divide into small groups and discuss customer selected topics—100% sharing.
CL - Funct	Resource Manager Best Practice "Day in the Life"	This class will provide a list of daily and weekly activities that every resource manager should follow to leverage Clarity PPM more effectively.
CL - Funct	Roadmap Management OOTB Introduction	Do you want to understand the OOTB configuration and functionality of roadmap management? In this class, we will review the OOTB objects, views, and functions of roadmap management.
CL - General	Monday Breakfast	Rego - Intro
CL - General	Monday Breakfast	Announcements
CL - General	Monday Lunch - Vendor	Key Rego Innovations - Rego Wagile Board, AIR, Extractor
CL - General	Sunday Reception	Welcome Reception
CL - General	Tuesday CA Product Roadmap	Broadcom
CL - General	Tuesday Lunch - Vendor	IT Design
CL - General	Wednesday Breakfast	Announcements
CL - Gov	6 Industry Trends for PPM	What should I expect to see within my organization related to PPM over the next couple of years? How should I prepare my PMs, PMOs, or myself to embrace the new trends within the industry? This class will share Rego's observations on industry trends within PPM.
CL - Gov	Adoption and Perception Strategies	Do you need to increase user adoption? Participate in this interactive discussion on the best practices for energizing your user base and increasing the perception of Clarity PPM's value.
CL - Gov	Agile Primer	Would you like to get an overview of the fundamentals of Agile? This session will dispel the misconceptions of Agile and provide an understanding of terms such as bimodal, Scrum, Kanban, weighted shortest job first, and SAFe. We will talk about how Clarity PPM fits into the Agile discussion and provide thoughts on how PMOs are responding to this trending methodology with best practices.
CL - Gov	AI and PPM: What Might the Future Hold?	At the Gartner conference, artificial intelligence was a hot topic. In this session, we will discuss some AI trends and potential impacts within the PPM industry.

	Name	Description
CL - Gov	Capturing Value and Strategic Planning	Are you considering using Clarity PPM's benefits tracking for planned and realized benefits? How do you track benefits that cannot be monetized? Did you know that Clarity PPM has a free module with the ability to track value metrics? Rego will walk you through some use cases where firms have been able to track strategic value, including monetary benefits, non-monetary benefits, and metrics related to them.
CL - Gov	Clarity PPM and Agile Integration Bimodal IT	Are you struggling to implement Agile tools at your organization alongside Clarity PPM? This class will review best practices for implementing Agile tools in conjunction with Clarity PPM while living in a bimodal world. We will discuss how Clarity PPM can govern both types of work and teams and how Agile tools should interface with Clarity PPM.
CL - Gov	Clarity PPM and Rally Software® Integration OOTB and Rego	Have you considered using Rally Software® in conjunction with Clarity PPM? Have you seen or heard about the OOTB connector? This class will go through the OOTB connector in detail and show how Rego has built add-ons to enhance the connectivity between these two tools.
CL - Gov	Clarity PPM Integrations Most Common	What integrations are the most requested and utilized? This class will review the most common interfaces to and from Clarity PPM, including best practice use cases and lessons learned from real implementations.
CL - Gov	Clarity PPM Support Organization Best Practices	Can your Clarity PPM support team become more efficient? This class will discuss how other users solve issues, discover solutions, and successfully use Clarity PPM. We will review industry best practices and how to support your user base with the optimal team.
CL - Gov	Contract and Vendor Management Clarity PPM's Role	Are you tracking your vendor contracts outside of Clarity PPM? Have you considered moving the data into Clarity PPM? This session will review a set of use cases where Clarity PPM is being used to manage vendor contracts and how they are linked to resources, projects, and time to drive efficiencies in monitoring contracts and comparing actuals to invoices.
CL - Gov	Dashboards and Metrics Best Practices	Are you looking for some great examples of dashboards that include metrics or KPIs? This session will review a host of sample metric dashboards in use today that can spark ideas for you to implement at your company.
CL - Gov	Excel and Clarity PPM Working Together	No matter how hard we try, many organizations cannot pry Excel out of the hands of project and resource managers. In this class, we will explore possibilities that embrace Excel as a great data entry tool. We will show useful case studies on quick Excel integrations deployed for customers.
CL - Gov	Getting More Value from SharePoint in PPM	Are your project teams using SharePoint effectively and getting the most value out of it? Is document management a daily struggle? Learn how to use SharePoint with Clarity PPM to seamlessly improve collaboration and team productivity.
CL - Gov	How to Design Professional-Looking Reports	We once had a client refer to the reports they developed as "Fisher-Price" reports. Reports should be built with consistency using graphic design principles. Join a Rego architect and UX designer to learn some fundamental graphic design principles such as grid theory, ink-to-data ratio, flow, balance, and more. Come prepared to be "wowed."
CL - Gov	ITBM Ecosystem and Competitive Analysis	Do you know what PPM, APM, Agile, ITFM, and other tools are available in the marketplace? Have you taken a strategic look at the key IT processes and tools that exist to support them? Have you been asked to evaluate and recommend a PPM tool? This class will review other ITBM tools and examine their pros and cons. We will also provide six keys to evaluating a PPM solution.
CL - Gov	Latest Clarity PPM Release Value Overview	Are you using an older version of Clarity PPM? Do you want to understand the value of new features and functions in recent versions? This class is a demonstration of the new features and the value of these features for customers.
CL - Gov	Manage Schedules Externally with Microsoft Project and Smartsheet OOTB and Rego Connectors	Are you struggling to use an external scheduler like Microsoft Project or Smartsheet with Clarity PPM, or are you investigating its potential? Learn how to effectively use these tools with Clarity PPM in this training session, which includes best practices and lessons learned. We will show both OOTB and Rego-built connectors that make bidirectional connections seamless.
CL - Gov	Migrating to the Modern UX Best Practices and Lessons Learned	Are you still using Classic Clarity? Are you wondering how and when you should transition to the Modern UX? This class will be a practical guide on how to know what to move and when to move it. We will discuss real use cases and help provide guidance on this strategic decision.
CL - Gov	Office 365 for Projects and Teams	Does your company have Office 365, but you're not sure what it can do for you? This session will cover what Office 365 is, including insights into how Office 365 can help your teams work faster and smarter.

	Name	Description
CL - Gov	Ongoing Training and Mentoring Best Practices	Do you struggle with how to implement a perpetual education program that continues to add value within the organization? This session will discuss best practices in the creation and structuring of an ongoing training and mentoring approach to assist with Clarity PPM adoption.
CL - Gov	Organizational Change Management Introduction	Have you heard of change management, but you're not quite sure what it is? This introductory class will provide a high-level overview covering the basics of change management as a practice to help your projects reach their goals and obtain benefits realization more quickly.
CL - Gov	PMO in the Age of Agile	Some PMO members have started receiving questions about the relevance of the PMO. This session will discuss why the PMO is even more relevant for an organization as it shifts to an Agile mindset.
CL - Gov	PPM Roadmap Always Have a Vision	We have found that one of the keys to long-term success within PPM is to have a living strategic roadmap. An organization must have a vision of where they want to be in order to keep moving forward. This session will review the key elements needed to create an effective roadmap that can drive increased maturity and excitement within your organization.
CL - Gov	Project-to-Product: A Practical Guide to Making the Transition	Our clients and industry analysts agree that the time has come to make the transition from "projects" to "products"—but many organizations seem to be struggling with how to get started or what to do (e.g. how to "scale Agility"). This session reviews key success factors of Clarity PPM's own project-to-product transition to provide insights into what might be confusing or challenging to your organization. We will provide practical advice on how to get moving in the right direction.
CL - Gov	Rally Software® and Agile Roundtable	This session will give you an opportunity to engage in a lively discussion with other conference participants. Learn how others might have solved similar problems.
CL - Gov	Rally Software® Demo	There are some top choices for Agile software. Learn why industry leaders turn to Rally Software® for their Agile needs. This will be a live presentation of Rally Software® with questions and answers.
CL - Gov	RegoLink and RegoXchange Offering Review	Have you looked at the RegoXchange or reviewed Rego's innovation offerings? This class will show you the power of Rego's pre-built content library, integrations, and other assets. See example after example of portlets, processes, and materials you can use to add value to your instance of Clarity PPM. Learn how you can introduce email-based approvals with Rego's Action Item Responder. Get a peek at Rego's new Microsoft Project integration that avoids issues faced with the OOTB integration. We'll show you Rego's pre-built connectors and explain how they can benefit your instance.
CL - Gov	Reporting Strategies	Are you overwhelmed by all the new reporting changes and options? This class will explore the various reporting tools available in Clarity PPM and help you understand the best way to output your data. We will provide use cases and examples to assist you in developing a reporting strategy for your organization.
CL - Gov	RMO Creation and Optimization	Does your organization struggle with resource management? Have you considered creating a Resource Management Office (RMO)? This session will review how some organizations are using RMOs to drive adoption and effectively manage resources, including real world examples of RMO setup and execution.
CL - Gov	Run IT as a Business: Technology Business Management (TBM) and IT Financial Management (ITFM) with Apptio	What is Technology Business Management (TBM) or IT Financial Management (ITFM)? Why is it important for IT? This session explores the need for TBM as well as how it drives significant cost optimization and more effective business-technology management practices. We will review the TBM framework, taxonomy, model, and how TBM processes and tools compliment your existing investment in PPM tools.
CL - Gov	Selling the Value of PPM	Do some folks in your organization view Clarity PPM as worthless or of little value? In this class, we will discuss how to increase the value perception of Clarity PPM and innovative ways to sell the value Clarity PPM provides to stakeholders and users.
CL - Gov	ServiceNow and Clarity PPM Integration Options	For clients that have both ServiceNow and Clarity PPM, passing information between the systems becomes vital for the enterprise with ITSM, demand, and PPM toolsets. One of the biggest areas of interaction is around demand management. Come and see Rego's integration solution, which flexibly allows for ServiceNow records (incident, problem, idea, enhancement, and demands) to generate Clarity PPM ideas or projects.

	Name	Description
CL - Gov	Stage Gating	How do companies track stage gates within Clarity PPM? This session will review some best practices for tracking, monitoring, and approving stage gates within Clarity PPM. We will also discuss pros and cons of various options to help you select the best method for your company.
CL - Gov	Surveys, Project Audit, and Quality Metrics Clarity PPM and SharePoint Working Together	Have you ever thought of using Clarity PPM for surveys or quality audits? Would you like to create dashboards with metrics from surveys, lessons learned, project audits, and quality? In this class, we will review a customer use case where all of this was done in Clarity PPM—linking to SharePoint to capture survey results, then producing dashboards inside of PPM and SharePoint based on very specific metrics.
CL - Gov	Using Blueprints in the Modern UX Best Practices	Struggling to figure out how to best organize your blueprints? This class will walk through best practice blueprint design, including how many to have, how to use channels, using custom subobjects within the blueprint, and swapping blueprints at various project stages to mimic project phases or ideas. We'll highlight some of the creative ways we've seen blueprints used in client implementations.
CL - Gov	When, Why, and How to Stay OOTB	Did you stray from OOTB? Was that the right decision? This will be a discussion on the pros and cons of sticking to Clarity PPM's stock attributes, views, and general capabilities. When does it make sense to avoid custom configuration? Conversely, when does it make sense to move beyond the standard OOTB setup?
CL - TechADV	Building an Inbound File-Based Integration Lab	Do you want to know more about building integrations using a flat file placed on an SFTP server? This hands-on lab will show you how to build an inbound flat file integration. We'll also discuss best practices around error handling.
CL - TechADV	Configuration and Administration in the Modern UX	If I build a process in the Classic UI, does it still get triggered in the Modern UX? If I add a new attribute in the Classic UI, how will it be exposed in the Modern UX? This class will focus on the setup of Clarity PPM's Modern UX. It will include topics like turning on the Modern UX, setting up links, using blueprints, and configuring tiles and objects. We will explain how the Modern UX and the Classic UI interact when it comes to administration.
CL - TechADV	Creating Channels and Links	Have you experimented with Modern UX channels and links? Our technical experts have unlocked these capabilities, allowing you to be creative in what you can do within the Modern UX. Learn how to make the most of them in this hands-on session.
CL - TechADV	Data Model Advanced	Do you have a good grasp on the data model for timeslices? This class will provide a detailed discussion of what they are, how to access them in SQL, how to structure them, and how to use custom time slices.
CL - TechADV	Data Model Intermediate	Do you have enough experience with the data model to be dangerous—maybe just with basic project and resource tables? This class will take you to the next level in understanding the Clarity PPM data model and provide training on how to write queries within Clarity PPM for use in your portlets and reports.
CL - TechADV	Expert GEL – Using Java	Are you already an advanced GEL script user looking to take your GEL to the next level using Java? This class is not for the faint of heart—we will delve into advanced Java within GEL scripts.
CL - TechADV	GEL Scripts Intermediate	Do you have a basic understanding of GEL scripts, but need a better understanding of how they work? This class will teach you how to XOG data into and out of objects in GEL as well as perform basic emails inside GEL.
CL - TechADV	GEL Scripts Introduction	Have you ever used GEL scripts within Clarity PPM? This class will teach you the basics of leveraging GEL within your workflow process. It's one of the most powerful and underutilized capabilities in Clarity PPM for updating objects, sending emails, and XOGing. This class is designed for those who have never used GEL before.
CL - TechADV	HTML Portlets Advanced	Have you ever wanted to build portlets that were not limited by Clarity PPM's out-of-the-box portlet types? This class will explore some of the options you can use to build helpful portlets with HTML, including calendars, Kanban boards, tile-based project lists, and some special Star Wars-themed communication portlets.
CL - TechADV	NSQL Portlets Advanced	Are you ready to build some advanced portlets? This class will teach you how to build very complex portlets. For example, you'll learn how to tap into time-scaled data to create a two-dimensional portlet. You will also learn how to build a hierarchical list where data is displayed in expandable levels to show parent/child relationships.

	Name	Description
CL - TechADV	NSQL Portlets Intermediate	Do you have basic NSQL and grid portlet knowledge along with the desire to step it up another level? This class will teach you how to create a simple chart portlet and walk you through the steps required to build the more complex drill down portlet.
CL - TechADV	Outbound File-Based Integrations with External BI Extracts	Do you want to know more about building outbound integrations using a flat file placed on an SFTP server? Does your organization have an external BI tool like Cognos, Tableau, Domo, or Qlikview? This session will review strategies for getting data into your corporate BI tools. We will also show Rego's data extraction tool and how it can be used for all outbound file-based integrations to save money and time.
CL - TechADV	Performance Optimization SQL Tuning and Jaspersoft Tricks	Are your reports and portlets performing well? This class will walk you through specific SQL tuning tricks to make queries run faster, increase end user satisfaction, and smooth-out system performance. This is an easy way to promote efficient future development and make a huge, positive impact on user experience.
CL - TechADV	Technical Lab	Could you use advice on specific, advanced technical issues? Participate in this open lab to get help on real technical items and some free technical consulting time.
CL - TechADV	Technical Round Table Q&A	Could you use advice on specific, advanced technical issues? Participate in this moderated Q&A discussion on complex technical issues and how to solve them.
CL - Tech-BEG	Administration Advanced	Learn advanced administrative development tasks—including objects and fields, object portlets, basic processes, and XOG. In the last portion of this class, we will walk through the high-level data model within the Clarity PPM database, including basic NSQL portlets. This is a technical class focused on basic configurations. It is designed for non-technical people, especially the last three hours of the day.
CL - Tech-BEG	Administration Beginner	Learn basic administrative tasks—including setting up resources, security groups, OBSes, lookups, time reporting periods, fiscal time periods, calendars, jobs, and timeslices. These activities are focused on ongoing support vs. new configuration.
CL - TechRPT	Jaspersoft Ad-Hoc Beginner	Learn how to take advantage of Jaspersoft's ad-hoc reporting capabilities, which come embedded in Clarity PPM 14.2 and later. This class provides hands-on exercises to teach individuals how to utilize the power of this new product. As users build their own reports and dashboards, the burden on developers will decrease, and Clarity PPM perception and adoption will increase.
CL - TechRPT	Jaspersoft Studio Advanced	"Do you already have a basic understanding of Jaspersoft Studio development? This session will include advanced topics like duplicating and modifying an OOTB report, multiple datasets, subreports, charting, widgets integration, and crosstabs. The detailed agenda is as follows: Jaspersoft Advanced – Out-of-the-Box Customization (2 hours) • Discover how to use OOTB reports, OOTB domains, resource bundles, and security access grant schemas. Jaspersoft Advanced – Chart Development (2 hours) • Explore multiple advanced charting techniques and types using built-in charting components, including properties (colors, plot options, sizing, gauges, etc.), dual pie chart, time series, and heat map. Jaspersoft Advanced – Scriptlets (2 hours) • Understand the basics of Jaspersoft Studio scriptlet development, utilizing Java libraries in custom Java classes to perform complex tasks in a simple manner. Jaspersoft Advanced – Roundtable (1 hour) • Understand crystal capabilities missing in Jaspersoft Studio, including sharing examples, report bursting needs, automation needs, and working with internal BI groups."
CL - TechRPT	Jaspersoft Studio Beginner	Learn how to create Jaspersoft studio reports. This session will walk through essential features and introduce report development, utilizing the basic reporting capabilities of Jaspersoft Studio. We'll cover text fields, frames, static text, breaks, and lines as well as common page information components like grouping, sorting, status indicators, dynamic images, input controls, and basic charting.
Extra	Agile Transformation What to Expect	Agile is here to stay, but Waterfall may be as well. Companies around the world struggle with living in a bimodal development environment while trying to go through Agile transformation. This working session will provide a discussion of best practices and lessons learned from companies that have gone through Agile transformations. We will also review SAFe as a potential approach.

	Name	Description
Extra	Application Portfolio Management Business Value	Does your organization want to implement application portfolio management (APM)? Are you trying to determine the value in implementing APM? Are you struggling to know what tool you should use and what data is important to collect? This session will review specific use cases of companies that have implemented APM and effectively used the data to drive value for the organization.
Extra	Introducing Apptio Agile Insights	In the new bimodal IT environment, does your organization lack insights into what Agile work is being done and what value is being delivered? Learn how Apptio Agile Insights merges data from multiple Agile tools, including Clarity PPM, to bring together a total picture of the value IT is delivering.
Extra	Jaspersoft Ad-Hoc Beginner	Learn how to take advantage of Jaspersoft's ad-hoc reporting capabilities, which come embedded in Clarity PPM 14.2 and later. This class provides hands-on exercises to teach individuals how to utilize the power of this new product. As users build their own reports and dashboards, the burden on developers will decrease, and Clarity PPM perception and adoption will increase.
Extra	Manage Your Technology Finances with Agility: IT Budgeting and IT Planning Approaches and Tools	Does your IT organization struggle with IT budgeting and annual planning? Does your annual budget and planning process take months? This session explores leading approaches and purpose-built tools to shorten your budget cycle, align resources to business needs, and plan resources into future years while reducing errors and manual effort.
Extra	PMO Continuous Assessment Best Practices	Are you ready to implement a continuous improvement practice within your PMO? This class is a working session to help build and sustain a continuous assessment initiative within your PMO, helping to manage goals and objectives from start-up through maturity. We will also discuss growth mapping to processes, tools, and strategic objectives.
Extra	PMO Maturity Assessment	How mature is your PMO? Where do you go from here? This class is a working session, which includes an exercise to assess how far you've come and help direct your course.
Extra	Power BI Dashboards Beginner	Clarity PPM now allows an external ODATA connector. Do you want to see the capabilities of Power BI and how this BI tool can be used to report against the Clarity PPM database? This class provides hands-on beginner training for Power BI, so that you can learn how to build basic reports against the Clarity PPM data warehouse.
Extra	Proactive Insights and Analytics for TCO: Tools and Data Sources to Help Calculate TCO	Does your organization struggle to understand your fully burdened TCO for the applications that enable your business? Do you use spreadsheets and disparate data sources to manually calculate TCO? This session explores the data sources needed to calculate the fully burdened TCO for applications. We will also cover marketplace tools that allow you to track spending, providing trends of applications broken down by run and development costs.
Extra	Project Management Minimizing the Risk of Failure	"Do you want to improve the success of your projects? This class will discuss some lessons learned on making projects more successful. We will discuss things like: <ul style="list-style-type: none"> • Developing robust test plans, creating effective use and test cases, and implementing test scripts that make sense. • Why failures occur and what you can do to minimize the impact and plan for success—including a case study on lessons learned. • Developing, testing, fine-tuning, and executing deployment plans for success."
Extra	Quantify the Value of Agile: Agile Executive Dashboarding	Do you want to analyze the cost and utilization of Agile development resources? Do you struggle to integrate financial information with work execution information from Agile tools such as Rally Software®, Jira, or VersionOne? This session explores reporting and dashboarding approaches to provide technology leaders with KPIs and trends for Agile execution, along with views that relate Agile team activity with cost and delivery.
Extra	Stakeholder Management	People are the #1 key to successful implementation, acceptance, and sustaining adoption after the project is long gone. Learn some tips and tricks on how to keep key stakeholders engaged.
Extra	Using APM App Rationalization	This session will walk you through a step-by-step approach to doing application rationalization within your organization. We will also review how to sell the benefits and processes within your organization.
CL - Alt	ServiceNow PPM Demo	Has your ServiceNow team been pushing ServiceNow's PPM product within the organization? This class is a demonstration of ServiceNow's PPM product with the goal of providing information on what it does and does not do. This is not a sales presentation or a feature-by-feature comparison with Clarity PPM.
